

XPENG P7+

Super Range-Extended Electric Vehicle (REEV)

Super REEV | 1550 Max Flagship Edition

EXTENDED-RANGE SEDAN WITH ULTRA-LONG PURE ELECTRIC RANGE

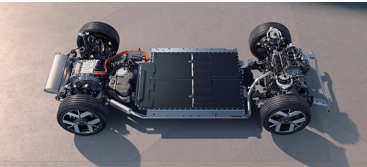

Whisper-Quiet, Imperceptible Range Extension

- ENC Range Extender Active Noise Cancellation
- Structural Optimization to Eliminate Noise at the Source
- Seamless Start-Stop Transitions

Superior Combined Energy Efficiency

- Ultra-Low Power Consumption of 12.5kWh/100km
- Sustained 150km/h Cruising Stability, Even at Low State of Charge

Save More, Worry Less

- Full Compatibility with Regular Gasoline
- 50% Fewer Maintenance Intervals

NEXT-GENERATION REEV

Up to 430km
LEADING PURE-ELECTRIC RANGE

1550KM
EXTRAORDINARY LONG CLTC RANGE

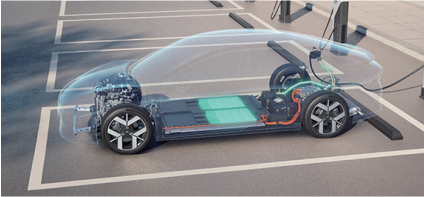

DUAL-POWER VERSATILITY

FUEL OR ELECTRIC EXTENDED RANGE PERFORMANCE, PURE EV EXPERIENCE

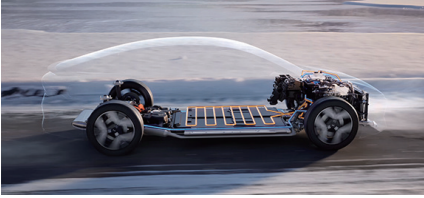

Standard Full-Domain 800V Architecture

- High-Voltage Silicon Carbide Platform
- 92.5% Peak Combined Electric Drive Efficiency

Standard Full-Domain 5C Ultra-Fast Charging AI Battery

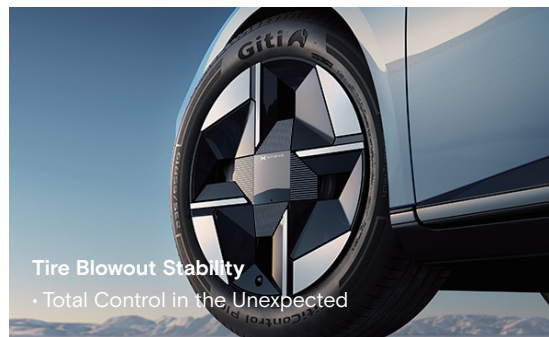

- 10-minute Charging Adds 420km of Range

Intelligent Thermal Management System

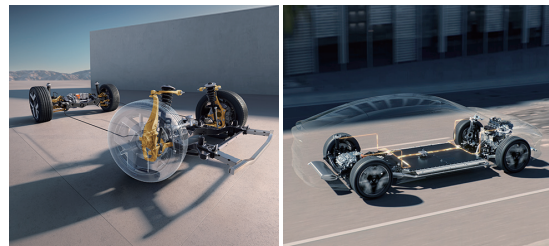

- Exceptional Energy Conversion Efficiency
- Ultra-Broad Thermal Control Range

WORLD-CLASS SAFETY EXCELLENCE

Tire Blowout Stability

- Total Control in the Unexpected

TAICHI AI CHASSIS

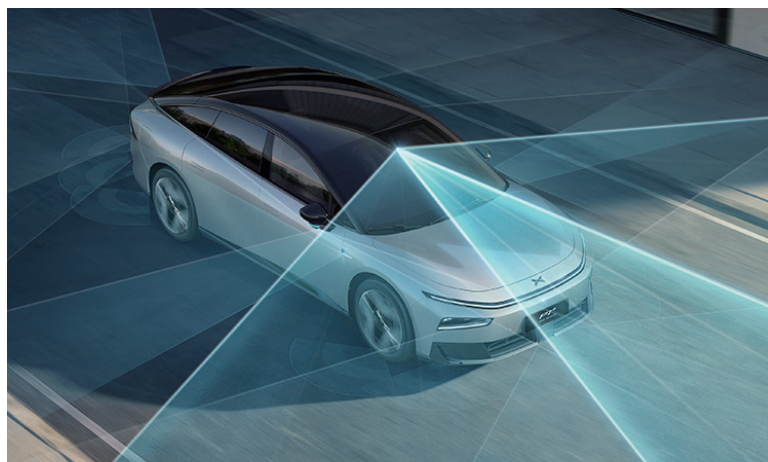

Effortless Mastery in Every Drive & Ride

- Upgraded Intelligent Variable Damping Shock Absorber
- Taichi Hydraulic Bushing Matrix
- Upgraded 6D Anti-Motion Sickness Algorithm
- AI Preview Function: one Step Ahead of Every Bump

AEB Automatic Emergency Braking AES Automatic Emergency Steering

- Supports operating speeds up to 130km/h
- AES supports low-friction surfaces, including ice and snow

- Multidimensional Battery Shield
- 37 Rigorous Safety Standards
- 20+ Proactive Early Warning Algorithms

- 2,000MPa Ultra-High-Strength Safety Body

- Mass-Produced Ultra-Large 16,000T Integrated Aluminum Die-Casting: 40,500 N·m/deg Torsional Stiffness

- 7 SRS Airbags Across the Lineup

ULTIMATE AI INTELLIGENCE

Tianji AIOS 6.0 Embedded

- Innovative Proactive Service Cockpit
- All-New Light Shaper Design Philosophy Super-Agent Intelligent Cockpit

*All visual renderings are for illustrative purposes and do not represent the final standard of the user interface or specific features of the delivered vehicle. Please refer to official XPENG channels and authorized stores for the final delivery specifications of your vehicle.

*Unless otherwise indicated, all data on this page is sourced from XPENG laboratories and should be used for reference only as actual results may vary.

*The suggested retail prices apply exclusively to private individual purchases and do not extend to commercial or fleet operations.

*Vehicle configurations may vary based on the specific production month, and specifications are subject to the actual vehicle available at the time of sale. Battery range and charging times are for reference only and will fluctuate according to real-world driving conditions and usage.

*All performance parameters are measured using standard vehicle configurations unless a specific note is provided.

*The AI driving assistance system is not capable of handling all traffic or weather conditions and requires constant driver supervision and manual intervention when necessary. Drivers must review the User Manual to understand all functional limitations before operating the vehicle in complex traffic or adverse weather.

*CLTC combined range and power consumption are measured in specific laboratory environments following the CLTC standard. Actual range and energy efficiency will vary in real-world scenarios due to ambient temperature, road conditions, vehicle status, and individual driving habits. When equipped with 20-inch wheels, the 1550 Max model achieves a CLTC combined range of 1500km and a power consumption of 13.1kWh per 100km, while intelligent optional upgrades have no impact on the CLTC range.

*Data is sourced from XPENG laboratories, and the 420km range increase within a 10-minute charge refers specifically to battery electric models. Actual charging performance depends on the vehicle's current state, compatible charging equipment, and the surrounding environment.

*These results are based on single tests of specific models under controlled conditions. AEB and AES are auxiliary functions only and cannot replace the driver's focused attention or accurate judgment, so please review the User Manual to understand all precautions and limitations before use.

*All data is sourced from XPENG laboratories, and actual performance results are subject to the vehicle's condition, compatible charging products, and environmental factors.

*The term Nappa leather refers specifically to the materials used on the primary contact surfaces between the seats and the occupants.

Xpeng P7⁺

1. CLTC combined driving range and energy consumption are tested under laboratory-specific conditions in accordance with the CLTC standard test cycle. In actual use scenarios, factors such as ambient temperature, road conditions, vehicle status, and driving habits will cause variations in actual range and energy consumption: After selecting 20-inch wheels, 1550 Max: CLTC pure electric range 410 km, CLTC combined range 1500 km, energy consumption 13.1 kWh/100km. Intelligent option packages do not affect CLTC combined range.
 2. Battery Charging Time: Battery charging time data is sourced from XPeng Laboratory, measured under normal temperature conditions using XPeng S4 supercharging piles. In actual use scenarios, factors such as ambient temperature, vehicle status, and charging pile status will cause variations in actual charging time.
 3. V2L Function: The reverse charger required for the V2L (Vehicle-to-Load) function needs to be purchased separately.
 4. Maximum Power Generation & Maximum Fuel-to-Electric Efficiency: Maximum power generation and maximum fuel-to-electric efficiency are tested under laboratory conditions. In actual use scenarios, factors such as driving conditions, ambient temperature, vehicle status, and fuel quality will cause variations in actual performance.
 5. Fuel Consumption Data: Fuel consumption data is sourced from MIIT (Ministry of Industry and Information Technology) official announcement, tested in accordance with GB/T 19753-2021 "Test Methods for Energy Consumption of Light-Duty Hybrid Electric Vehicles". Due to factors such as driving habits, road conditions, climate conditions, fuel quality, and energy prices, actual data may differ from the announced values.
 6. Nappa Leather Material: "Nappa leather" refers to the material used for the main areas of the seat that come into contact with the passenger's body.
 7. Rear Seat Heating / Ventilation / Massage: Rear seat heating, ventilation, and massage functions are available for the left and right seats only; the center seat does not feature these functions.
 8. Wireless Charging: Mobile phones must support wireless charging functionality. Charging power and speed may vary depending on phone model, phone status, and other factors.
- Disclaimer: Vehicle configuration information applies only to corresponding models produced within specific production months and may vary for vehicles produced in different months. Battery range and charging times are for reference only and are subject to change based on actual usage conditions. This configuration table is for reference purposes only; actual specifications shall be subject to the vehicle available at authorized sales outlets.
- Unless otherwise specified, all performance parameter values in this table are tested under standard configuration conditions.
- The AI-Assisted Driving System cannot handle all traffic, weather, and road conditions. The driver must always remain attentive to current traffic conditions and be prepared to intervene if the AI-Assisted Driving System fails to provide appropriate steering assistance or maintain proper distance and speed. Please read all sections of the owner's manual regarding this function to understand its limitations. Drivers should be aware of these limitations before using the function. Use with caution in complex and changing traffic conditions, slippery conditions due to ice, snow, or rain, flooded or muddy roads, poor visibility, winding mountain roads, or highway entrances and exits.

BOUNDARY-BREAKING SPACE

A SPACE PRODIGY | C-CLASS DIMENSIONS, D-CLASS ROOMINESS

88% Spatial Efficiency
